Education

M.S

Information Technology

Nova Southeastern University

Davie, FL

B.B.A.

Finance

Florida Atlantic University

Boca Raton, FL

Skills

Languages: Python (Programming Language), CSS, HTML, SQL

Software: Visual Studio Code, Microsoft Office (including Excel), Tableau, Microsoft Azure, Google Cloud Platform(GCP),

Operating Systems: Microsoft Windows, Mac OS

Other:

Troubleshooting, Problem Solving, Leadership, Teamwork, Adaptability, Written Communication, Critical Thinking

Diligent Information Technology student with proficiency in Python and SQL. Skilled in managing datasets, working with databases, and utilizing pivot-tables. Adaptable to fast-paced environments and adept at meeting tight deadlines. Seeking a Data Analyst role to leverage and expand technical expertise while making a meaningful impact on data-driven projects.

Work Experience

Data Engineer Intern

Activision Blizzard | Irvine CA

May 2023 – Aug 2023

- Developed data pipelines using Apache Airflow, ensuring efficient and reliable data movement and processing.
- Migrated data from Oracle to Google Big Query, optimizing data storage and retrieval for improved performance.
- Utilized Python to develop software solutions for the business, automating data-related tasks and improving data accessibility.
- Participated in code reviews and contributed to the improvement of data engineering best practices.

Data Analyst (Part-Time)

Tacaya | Montego Bay St. James

Mar 2020 – Aug 2022

- Managed customer feedback by aggregating and applying data cleaning and standardization techniques. This provided comprehensive insights to management on product reception and customer satisfaction, enabling informed decisions regarding product continuation, discontinuation, or reintroduction.
- Developed Excel dashboards to visualize product quantities at each life cycle stage, enhancing understanding and decision-making.
- Executed data tracking for products throughout their life cycle. Additionally, utilized Excel to maintain the product database, leading to a more efficient and less archaic inventory management approach.

Personal Project

Development of Forex Trading Algorithm | OANDA REST API

- Designed and implemented a Python-based trading algorithm using various Python libraries to execute trades based on well-defined assumptions.
